Conference of Maisha e.V.

# Impacts of Violence on Women's Health

„There is one universal truth, applicable to all countries, cultures and communities: violence against women is never acceptable, never excusable, never tolerable.“

(Secretary-General Ban Ki-moon)

Throughout, the women must face physical and psychological violence regardless of their legal status, age, sexual orientation, religion and social or cultural background. Exposure to violence affects the health of women, in some case causing long lasting physical and mental illnesses. As in many other countries, domestic violence ist still a taboo in Germany.

The resources, solutions and help that many women need may be beyond their reach.

Maisha e.V. wishes to raise awareness through the conference *Impacts of Violence on Women's Health*, to which you are warmly welcome.

Every interested, curious and committed woman can join the conference.

We are looking forward to your participation.

**No entrance fee - Food is free of charge**
